1 Introduction

1.1 What is withdrive?

Withdrive is an upcoming car-pooling platform that will be used by drivers and passengers alike.

Carpooling is the act of sharing car journeys- meaning one person can travel somewhere and others can come on as passengers and the price of the trip can be shared and or paid to the driver.

1.2 Document purpose and overview

This document will go over requirements for the withdrive project. This document is to be formally called a project plan, as it will discuss and document the various significant details/information that has relevance in the project.

2 User story backlog

For this project, a multitude of user stories are necessary to make development focused on adhering to what the users would want and expect.

Each story is covers two main types of end users. The user and the admin. With the user type having two sub types. That being a driver and passenger.

Each story has a user story title and corresponding incrementing number, that is later used in other documents for reference.

Each story has a priority rating from 1-20, 1 being **maximum** priority and 20 being **minimum**.

Each story also has an estimate for completion, for this I opted to use **story points** using the **Fibonacci** numbering system.

Title:	Priority:	Story Points:
US-01 Create user account	1	1
User story: As a new user, I want to be able to create a new account so that I can interact with the website features.		
Acceptance Criteria: <ul style="list-style-type: none">I should be able to enter the following data:<ul style="list-style-type: none">➤ Email➤ First name➤ Last name➤ Date of birth➤ Gender➤ Phone Number➤ PasswordThere must be a repeat password field so that no mistake is made.		

Title:	Priority:	Story Points:
US-02 Signing in	2	1
User story: As a user of the platform I want to be able to login so that I can access features that are behind		
Acceptance Criteria: <ul style="list-style-type: none"> I should be able to login using my credentials: <ul style="list-style-type: none"> Email Password Login should be secured with encryption. 		

Title:	Priority:	Story Points:
US-03 Logging out	3	1
User story: As a user of the platform, I want to be able to log-out so that I can safely leave the site.		
Acceptance Criteria: <ul style="list-style-type: none"> As I logout I should be taken to the landing page. 		

Title:	Priority:	Story Points:
US-04 Create a ride	4	8
